

NEO GEN

TAILORED ENERGY LEVELS THAT CAN TREAT ALL SKIN TYPES, GENDERS, + AGES

It addresses and enhances the entire skin structure, targeting multiple concerns at once.

The treatment is suitable for the entire body, including the delicate peri-ocular area. It promotes the formation of a natural barrier on the treated skin, facilitating recovery.

Treatment protocols are customizable to suit individual needs. NeoGen provides corrective treatments with comprehensive ablative CO2 results, offering substantial improvement with significantly reduced downtime, risks, and post-treatment complications.

NeoGen vs. Microneedling

NeoGen requires fewer clinic visits, with many patients achieving their desired results after just one treatment, compared to the three+ visits needed with microneedling. Unlike microneedling, which can cause volume loss and grid marks and may leave patients with prolonged burning and tingling, NeoGen is less painful, avoids fat melting on the face, and typically results in only mild redness similar to a chemical peel.

NeoGen vs. Lasers

People choose NeoGen over fractional lasers because it produces a collagen trio—types I, II, and IV—restoring volumetric skin features, while fractional lasers only stimulate collagen type I and leave untreated skin areas. Additionally, NeoGen ensures uniform treatment, minimizes swelling, and shows results as early as 30 days, whereas fractional lasers can cause delayed results, more swelling, and less effective resurfacing for older clients.

FROM WITHIN

NEO GEN

NeoGen is an FDA-cleared, nonsurgical skin regeneration treatment that offers minimal to no downtime for all skin types. Using advanced nitrogen plasma technology, NeoGen effectively tightens, resurfaces, and rejuvenates the skin. It stands out as the first and only clinically proven method for comprehensive skin regeneration.

By treating 100% of the skin, NeoGen stimulates deep-layer regeneration, remodeling natural skin architecture, and fostering healing from within.

EXPERIENCE A LEVEL OF REJUVENATION LIKE NEVER BEFORE.
